MOTIF

ALIGARH MUSLIM UNIVERSITY

Aligarh Muslim University (AMU) is among the oldest central universities in India. The Aligarh Muslim University is the most important institution for the spread of modern education and social reforms among Muslims. Sir Syed Ahmad Khan (1817-1898) the founder of the University came from a family of nobles of the Mughal Court. He advocated English education for the regeneration of Muslims in India. His greatest achievement was the establishment of the Mohammedan Anglo-Oriental College at Aligarh in 1875. In course of time, this college became the most important educational institution of Indian Muslims. The Mohammedan Anglo-Oriental (MAO) College, which later on became the Aligarh Muslim University, fostered a modern outlook among the generation of students that studied here. The college, and later when it became a University, attracted students from all communities. The university is open to all irrespective of caste, creed, religion or gender. The University has consistently ranked among the best educational institutions in India.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st.phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Neena Sharma,(IAS), Director of Census Operations Uttar Praesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division**.** I am thankful to all of them and others who have contributed to bring out this publication in time.

Preface

The District Census Handbook (DCHB) published by Census Organisation since 1951 Census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics (village-wise and town-wise) of the district along with the status of availability of assets, amenities, infrastructural facilities, etc of Households. It is expected that this publication will help the planners in formulation of micro level development plans.

The District Census Handbooks (DCHBs) are brought out in two parts giving village and town wise data for each district. The Part–A contains non-census data for each Village and Town and is called Village and Town Directories. The Part-B provides census data for rural areas up to the village level and for urban areas up to the ward level for each town or city in the shape of Primary Census Abstracts.

The present series of 2011 census DCHBs known as "**DCHB-Part-A.** The village and town level amenity data have been collected in pre printed scheduled which was filled up by the district administration and compiled and computerized in prescribed record structure. This includes educational facilities, medical facilities, drinking water, post & telegraph, communication, bank, credit societies and recreational facilities being availed by the respective villagers. In Town Directory, the information of all statutory towns irrespective of their class, and basic amenities available in the towns are analyzed in depth with the help of a number of cross-classified inset tables and statements which reveals the significant characteristic of the Towns.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity wasn't available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the

details and the data of each town have been presented viz.; (i) Status and Growth History of towns,(ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv)Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi)Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

(ii) Brief History of the District:

The early history of the region covered by present district Aligarh lies in a dim past and is to some extent fragmentary and uncertain. The region never corresponded to any one kingdom and it was only now few occasions that the whole of it formed part of a single realm. It is very often being divided among several bordering states.

The ancient history of the district is not known due to unavailability of any authentic material. As the legends have it, the district formed part of Pandavas kingdom after they shifted to Ahar in Bulandshahr district from their dilapidated kingdom of Hastinapur. Before the 18th century, Aligarh was known as Kol or Koil Caste, the name of a place or mountain and the name of a sage or demon. Study of the place-name indicates that the district was once fairly well covered by forests and groves. The history of the district through the 12th century AD is obscure. According to Edwin T. Atkinson, the name Kol was given to the city by Balarama, who slew the great Asura (demon) Kol there and, with the assistance of the Ahirs, subdued this part of the doab. In another account, Atkinson points out a "legend" that Kol was founded by the Dor tribe of Rajputs in 372 A.D. This is further confirmed by an old fort, the ruined Dor fortress, which lies at the city centre.

Some time before the Muslim invasion, Kol was held by the Dor Rajputs. In the time of Mahmud of Ghazni, the chief of the Dors was Hardatta of Baran. Statues of Buddha and other Buddhist remains have been found in excavations where the citadel of Koil stood, indicating a Buddhist influence. Hindu remains indicate that the citadel probably had a Hindu temple after the Buddhist temple. There are traces of Buddhist culture and inhabitation in certain towns of the district. In the district remains of Buddhist settlement have been found in Balai Qila at Koil which are kept in Aligarh institute. Some other materials of same period have been unearthed from the great mound called Gohan Khera to the east of Sasni which now lies in district Hathras. In the second B.C. the district was under the reign of the king Mathura. The coins of that period were found from many places. Later the district was conguered by great Kushanas. After the decline of Kushanas the power came under Samudra Gupta in the middle of 4th century A.D. Tomar Rajputs established themselves at Delhi and its surrounding areas including Aligarh and they largely ruled as feudatories of Gujar Pratihars during middle of 9th and 10th century A.D. In subordination to the paramount rulers were Dor Rajput of Baran or Bulandshahr, who held local power and whose genealogy for some ten generations has been preserved. Dors were defeated by Prithvi Raj Chauhan, who is said to have built a fort in Loni With the defeat of Prithvi Raj Chauhan in 1192, the district was captured by Qutb-ud-din-Aibak. Qutb-ud-din Aibak appointed Hisam-ud-din Ulbak as the first Muslim governor of Koil. It remains part of Delhi Sultanate till the establishment of Mughal dynasty.

The medieval history of India says that the area came under the Lodi dynasty. The then king of Lodi dynasty Sikander Lodi gave Koil and its surrounding areas to Umar Khan the son of Suri Afaghan but in the begining of the reign of Ibrahim Lodi, the Zamindars of Jatrauli raised a rebellious and defeated Umar Khan, who was killed in fight. There after Qasim Khan of Sambhal crushed the rebellion. Koil was then given to Umar's son Muhammad Khan who built a fort of Mahammad Garh in 1526, which was later on known as Aligarh. Under the reign of Akbar of Mughal dynasty, Koil had no remarkable importance of it, the then capital of Sarkar formed a part of Agra province. The Sarkar was divided into four dasturs Koil, Akahabad, Marhara and Farida. In the reign of Akbar, Kol was made a Sirkar and included the dasturs of Marahra, Kol ba Haveli, Thana Farida and Akbarabad. Both Akbar and Jahangir visited Kol on hunting expeditions. Jahangir clearly mentions the forest of Kol, where he killed wolves.

During the time of Ibrahim Lodhi, Muhammad, son of 'Umar, was the governor of Kol. He built a fort at Kol and named the city Muhammadgarh, after himself, in 1524–25. Sabit Khan, who was then the governor of this region, of Farrukh Siyar and Muhammad Shah, rebuilt the old Lodhi fort and named the town after himself: Sabitgarh. The Jat ruler, Surajmal, with help from Jai Singh of Jaipur and the Muslim army, occupied the fort of Koil. Koil was renamed Ramgarh and finally, when a Shia commander, Najaf Khan, captured it, he gave it its present name of Aligarh. Aligarh Fort (also called Aligarh Qila), as it stands today, was built by French engineers under the command of French officers Benoît de Boigne and Perron

Before coming under full control of Britishers the district envisaged many ups and downs. The Battle of Aligarh was fought on 1 September 1803 during the Second Anglo-Maratha War (1803–1805) at Aligarh Fort. The British76th Regiment, now known as the Duke of Wellington's Regiment besieged the fort, which was under the control of the French officer Perron, and established British rule. In 1804, the Aligarh district was formed by the union of the second, third and fourth British divisions with the addition of Anupshahr from Moradabad and Sikandra Rao from Etawah. On 1 August 1804, Claude Russell was appointed the first Collector of the new district. During the mutiny of 1857, the history of Aligarh was full of incidents. (V) CENSUS CONCEPTS AND DEFINITIONS

Building: A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House : A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of

their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. **The urban-** area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns : All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

(b) Census owns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

   1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

   1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce** : These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the first position in the district. Table 34 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 33.19 per cent of total population. Among these workers, cultivators constitute 33.23 percent, 30.20 percent agricultural labourers, 6.16 per cent household industry workers and 30.41 percent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 6.16 percent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (18.74 percent) is lower than males 37.66 of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 17.58 percent in Lodha C.D. block to 44.64 per cent in Tappal C.D. block. Similarly for other workers, the lowest proportion is 18.55 per cent in Gangiri C.D. block while 57.83 percent is the highest in Lodha C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 36.36 percent in the district. The percentage of agricultural labourers is highest in Akrabad. (37.40) block and is followed by Gonda (35.53). In other C.D. blocks, this proportion is almost similar. Similarly, household industry workers varies in C.D. blocks between 3.58 percent in Tappal and 8.11percent in Iglas.

Table 35 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Aligarh. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other worker (83.35) followed by household industry workers (7.90) percent males and 11.85 percent female). If we observe each town, the table reveals that highest percentage of cultivators (28.99) is recorded in Jalali(N.P) in the agriculture labourers category Pilkhana (NP) has recorded highest 48.21 per cent and very low percentage (0.31) in Qasimpur power and Deosaini (C.T) has household industry worker rates lowest (0.82 per cent). As the usual trend recorded in the urban areas, other workers are in highest percentage (97.97) percent in Qasimpur Power followed by 92.64 percent in Harduagan (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 36 to 45 :

One of the major parts of the District Census Handbook is Village and Town Directories. These incorporate non Census data showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of the above amenities.

Table 36 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1170 inhabited villages in the district, 1117 villages (95.47 per cent) have been provided with the educational facility of one type or the other. Similarly 370 villages in the district constituting 31.62 per cent have medical facility of one type or the other. Improved drinking water facility is available in 1165 (99.57 per cent) villages. As regards, post office facility, which includes facilities like telegraph office and post and telegraph, 296 villages constituting 25.3 per cent of villages have been provided with this facility within the village. 843 (72.05 per cent) villages have been provided with the telephone facility, 371 (31.71 per cent) with transport facility, 56(4.79 per cent) villages with bank facility and 76 (6.5 per cent) with agricultural credit societies. There are 1010 (86.32 per cent) villages which have been linked with the pucca road. Total 1167 (99.74 per cent) of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Bijauli CD block has the highest percentage (100 percent) of villages where educational facility is available and lowest (92.71 per cent) is found in khair. Medical facility is highest in Atrauli (56.88) and lowest (12.79 per cent) in Akrabad CD block. Power supply facility is available to cent percent villages in all CD blocks except Tappal, Chandaus and Atrauli one village each have not the power supply facility. Similarlry remaining availability of different amenities in CD blocks also we can see in above table.

(xiv) Scope of Village Directory & Town Directory

As mentioned earlier, the District Census handbook is brought out in two parts-Part A and Part B separately. Part-A covers Village and Town Directory data of 2011 Census where as Part-B covers Village and Town wise Primary Census Abstract (PCA) data of 2011 Census along with Housing amenities data. The scope of village directory and town directory is discussed below.

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2011 and 2001 census has been presented. The rational of giving 2011 location code along with 2001 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references.

For the census work, the villages in the district have been arranged taluka wise (C.D. block wise) and within the taluka (C.D. block), they are shown location code wise. Each village is assigned a location code number for the purpose of identification. In 2011Census, all the villages have been given unique 6 digits code number, which will remain constant across the census, and shall make it easy to do comparative study. The village code of 6 digits has been used continuous code within India. Range of 000001-799999 has been kept for villages. The village directory information, a map and alphabetical list of village for each taluka (C.D. block) is given in Part-B. Village directory contains the non census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the correlation of amenities with the number of households and population they serve. If an amenity is not in existence in the refer rant village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given. The broad range with code a for (<5 kms.), b for (5-10 kms) and c for (10+ kms). Some additional information has been added viz. (1) Pre.
